### How risky is it?

The value of the Fund can go down as well as up. You could lose money.

In assessing the risk level of a fund, most fund managers use a methodology based on volatility which looks at how much a fund's returns change over time. However, for this Fund, Bullion Management Services Inc. identifies the risk level based primarily on qualitative factors (e.g., negative correlation to other asset classes, effective hedge vs inflation and value of US dollar, preservation of purchasing power and intrinsic value) and Bullion Management Services Inc.'s views on the fundamentals of silver and the role of silver as a wealth protection strategy.

**The risk rating of this Fund may not be comparable to other mutual funds that use a methodology based on volatility of fund returns.**

For a description of the risk classification methodology that Bullion Management Services Inc. uses to rate the risk level of the Fund, see the "Fund Risk Classification" section of the simplified prospectus.

### Risk rating

Bullion Management Services Inc. has rated the risk rating of the Fund as **medium**.

This rating is based on qualitative factors and Bullion Management Services Inc.'s views on the fundamentals of silver and the role of silver as a wealth protection strategy. It doesn't tell you what the risk rating of the Fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the Fund's returns, see the "What are the Risks of Investing in a Mutual Fund?" section of the Fund's simplified prospectus.
