

BMG BullionFund

Class D - Canadian Dollars

Fund Objective

BMG BullionFund is an open-end mutual fund trust that purchases unencumbered gold, silver and platinum bullion and stores it on an allocated and insured basis. BMG BullionFund's objective is to provide a secure, convenient, low-cost, method for investors to hold gold, silver and platinum bullion as part of their portfolio for capital preservation, capital appreciation, portfolio diversification and portfolio hedging purposes against the volatility of other investments.

Fund Strategy

No derivatives, futures contracts, options or certificates are used. The maximum cash component is five percent. The fund invests in a responsible manner and adheres to the "criteria for responsible investing."

No Paper Bullion - BMG BullionFund does not invest in shares of mining companies, certificates, pooled accounts, closed-end funds, ETFs, derivatives, or bullion proxies of any kind.

Unencumbered Bullion - BMG BullionFund does not lease its holdings, and no derivatives, futures contracts or options are used.

Allocated Storage - BMG BullionFund's bullion is stored in a London Bullion Market Association (LBMA) member vault on an allocated and insured basis under a custodial agreement with RBC Investor Services Trust operating as RBC Investor & Treasury Services (RBC I&TS) as custodian for the BMG Funds and the appointment by the custodian of the Royal Canadian Mint (the Mint) and certain sub-custodians of the Mint, including Brink's Canada Limited (collectively with its global affiliates, Brinks), as sub-custodians of the BMG Funds. Reports on bullion holdings from RBC I&TS include details of the refiner, exact weight, purity and serial number for each bar. Bar holdings are published on the BMG website and holdings are audited by RSM Canada LLP as part of our annual audit.

Third-Party Administrator - RBC Investor Services Trust is responsible for the Fund's banking, record keeping and daily valuation. RBC Investor Services Trust processes all redemptions and purchases and pays authorized Fund expenses.

Liquidity

Bullion is bought directly from or sold directly into the global bullion markets. Purchases or redemptions of any size can be accommodated without affecting Net Asset Value. As a result BMG BullionFund has the same liquidity as gold, silver and platinum bullion itself. In contrast, the liquidity of closed-end funds and ETFs are dependent on the number of shares that are traded.

No Counterparty Risk

BMG BullionFund owns the bullion outright, with no dependency on third parties and no possibility of third-party claims.

Independent of Portfolio Management Skills

BMG BullionFund has a fixed investment policy that cannot be varied without unitholder approval. BMG BullionFund does not hedge, market time, leverage. As a result, performance tracks the price of bullion and not the trading skills of a portfolio manager.

Tax Benefit

No sales tax or withholding tax is applicable on bullion in Canada. The BMG BullionFund is approved for all Canadian registered plans, including RRSPs, RRIFs & TFSA's.

About BMG Group Inc.

BMG Group Inc. (BMG) is a precious metals bullion company. BMG focuses on protecting investors' wealth through the purchase and storage of physical gold, silver and platinum bullion for wealth protection and true portfolio diversification.

NAV per Unit:	\$11.31
Fund Code*:	BMG130

This fund is available for sale in Class A, B, C, D, E, F, G, & I. Please consult with your advisor to determine which class is appropriate for you.

Key Reasons to Invest in this Fund

- Very attractive fundamentals: because of increasing money supply, weakening currencies, and low to negative interest rates
- Physical supply constraints in physical silver bullion, increased demand above supply, falling mine production
- The fund maintains all the attributes of pure bullion - highly liquid, no counterparty risk, trades at NAV and no manager dependency
- Protects against inflation, deflation, currency devaluation, diversifies portfolios and is a store of value
- No market timing, hedging or leverage employed
- Generally no more than 5% of the NAV is held in cash

Risk Rating

This risk rating of the Fund is in accordance with a standard risk classification methodology based on how the fund's returns have changed from year to year as a **stand-alone** investment.

See the Fund's Simplified Prospectus, for more information about the risk rating and specific risks that can affect the fund's returns.

The BMG BullionFund is **not intended to be a stand-alone investment**, and should not represent more than 20% of an investor's overall total investment portfolio including any other bullion investments. Due to the fact that bullion typically has a low correlation to other financial assets, including it as part of a portfolio should generally reduce the portfolio's volatility and may improve portfolio returns over the long term.
