### Caution regarding forward-looking statements

Certain portions of this Annual Management Report of Fund Performance, including, but not limited to, “Recent Developments”, may contain forward-looking statements about BMG Gold BullionFund (the “BMG Fund”) including statements with respect to strategies, risks, expected performance events and conditions. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as “could”, “would”, “forecasts”, “expects”, “anticipates”, “intends”, “plans”, “believes”, “estimates”, “projects” and similar forward-looking expressions or negative versions thereof.

Forward-looking statements are not guarantees of future performance and actual results or events could differ materially from those expressed or implied in any forward-looking statements made by the BMG Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, such as interest and foreign currency rates, investment sentiment, volatility of precious metals prices, demand for various precious metals, and other factors affecting precious metals, currency fluctuations, global equity and capital markets, changes in government relations, unexpected judicial or regulatory proceedings and catastrophic events. We stress that the above-mentioned list of important factors is not exhaustive. Some of these risks, uncertainties and other factors are described in the BMG Fund’s simplified prospectus, under the heading “Risk Factors.”

We encourage you to consider these and other factors carefully before making any investment decisions. Forward-looking statements should not be unduly relied upon. Further, you should be aware that the BMG Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance, and that the forward-looking statements speak only to the date of this Annual Management Report of Fund Performance.

## MANAGEMENT REPORT OF FUND PERFORMANCE

### Investment Objective and Strategies

BMG Gold Bullion Fund (the “BMG Fund”) invests in unencumbered, fully allocated physical gold that is held by the Bank of Nova Scotia. The BMG Fund’s objective is to provide a secure, convenient method for investors seeking to hold gold bullion for capital preservation, long-term appreciation, portfolio diversification and portfolio hedging purposes.

All physical bullion purchased by the BMG Fund meets the London Good Delivery standard as set out by the London Bullion Market Association (“LBMA”).

The economic factors that determine the price of gold are, in most cases, opposed to the factors that determine the prices of most other financial assets. Ownership of BMG Fund units, therefore, acts as a hedge against the volatility of other investments. Units of a class of the BMG Fund are not speculative, and are only intended to be one part of an investment strategy.

A small portion of the BMG Fund's assets (generally no more than 5%) may be held in cash to allow the BMG Fund to pay its expenses, and to facilitate any redemption of units of a class of the BMG Fund. The BMG Fund will not use derivatives or invest in securities or certificates of companies that produce gold bullion. The BMG Fund will not invest in foreign securities, and it does not hedge its holdings. The value of the BMG Fund, therefore, is purely a function of the spot price of gold bullion. The BMG Fund’s objectives and strategies did not change in 2018.

### Risk

The risks associated with investing in the BMG Fund remain as stated in the simplified prospectus dated November 27, 2018. The principal risk associated with investing in the BMG Fund is the fluctuating price of gold, as well as fluctuations in the relationship between the Canadian and US dollars. In addition, the BMG Fund will be subject to precious metals risk, non-hedging strategy risk and specialization risk. Our view of the BMG Fund’s risk rating was unchanged in 2018.

### Results of Operations

**All monetary amounts are expressed in Canadian dollars, unless otherwise indicated.**

In 2018, the net asset value (“NAV”) of the BMG Fund decreased 12.2%, from \$91.7 million at December 31, 2017 to \$80.5 million at December 31, 2018. The decrease was primarily driven by \$13.9 million in net redemptions and \$2.4 million in total expenses, offset by \$5.1 million realized and unrealized gains on investments. As at December 31, 2018, the BMG Fund’s gold holdings were 45,952 ounces, compared to 56,182 ounces at December 31, 2017.

For the year ended December 31, 2018, the NAV per unit of the BMG Fund’s Class A units increased by 4.1% in Canadian dollars, and decreased by 4.5% in US dollars, while the NAV per unit of the BMG Fund’s Class F units increased by 5.2% in Canadian dollars, and decreased by 3.5% in US dollars.

Gold’s 2017 year-end price was US\$1,296.50. During 2018, the gold price increased by 4.5% to reach a high of US\$1,354.95 per ounce in January. The price declined thereafter, and closed at US\$1,278.30 on December 31.

Daily average net assets decreased by 11.5% from \$105.4 million in 2017 to \$93.3 million in 2018. The decrease was primarily driven by net redemptions, offset by the performance of gold bullion. Total expenses decreased by 17.2% from 2017, because of the decrease in average net assets.

### Recent Developments

Following a weakening of precious metals prices mid-year, gold rallied during December 2018 as safe-haven buying returned to the market due to volatility and a decline in equities globally. Some one-day swings in the equity markets are increasingly testing previous records or setting new ones, such as the worst Christmas Eve decline ever recorded by the Dow Jones Industrial Average (“DJIA”) and S&P 500. The next business day, the DJIA recorded the biggest points gain in its history. A number of significant, complex macroeconomic and geopolitical issues culminated to warrant elevated investor concerns about the economic outlook. Those concerns include a global growth slowdown amid trade tensions, the pace of normalization of monetary policy, rising protectionism, the upward trajectory of massive global indebtedness, and uncertainty over Brexit: will it be an orderly exit or a no-deal exit.

The IMF recently lowered the forecast for the 2019 global GDP growth rate to 3.5% from the 3.7% predicted only a few months ago in October 2018 and the 3.9% forecast a year ago. Growth in China is slowing down; it was 6.6% for 2018, the lowest since 1990, due to a growing trade dispute with the US and a maturing of its market. The US is also facing a slowdown from both the expected diminishing effect of its tax stimulus, and trade wars initiated with China and other trading partners with the introduction of tariffs. Japan’s economy shrank in both the first and third quarters of 2018, and it is expected to have negative growth in the fourth quarter as well. Eurozone GDP growth is also slowing down, with its largest economy, Germany, experiencing lower growth in 2018 of 1.5% compared to 2.2% in 2017. The IMF forecasts growth in 2019 to be even lower at 1.3%. France’s growth dropped to 1.5% in 2018 from 2.3% in 2017. Italy experienced a mild recession in the second half of 2018.

Ten years after the financial crisis and recession of 2008, global debt has risen from US\$178 trillion to US\$244 trillion, a 37% increase, as the economic recovery has been fueled by an expansionary monetary policy. In recent years, the US commenced the process of normalization and, in 2018, the Federal Reserve hiked rates four times and is currently shrinking its balance sheet, although it is indicating a policy of patience and a normalization of its balance sheet sooner and to a larger size than previously estimated. The European Central Bank ended its quantitative easing at the end of 2018 but remains accommodating, as it has not announced any plans to shrink its balance sheet. Japan’s central bank is still accommodative. Rising interest rates are a major concern for emerging markets with foreign currency denominated debt, as their ability to service, repay or refinance the debt becomes increasingly difficult. Advanced economies will also be faced with hard choices, as debt servicing consumes a larger portion of budgets for all levels of government, corporations and households. The flattening of the yield curve in the past year is both a reflection of concerns over the economic slowdown and monetary policy. In an economic slowdown, central banks are in a weaker position than a decade ago to use monetary policy tools with vastly inflated balance sheets, and interest rates are lower (or even negative) in certain jurisdictions.

### Gold

The gold price ended the year at US\$1,278.30, a decrease of 1.4% from the prior year’s close. In Canadian dollars, it increased by 7.5% over the same period, as the Canadian dollar weakened against the US dollar.

The 2018 gold demand trends published by the World Gold Council indicate that overall demand increased by 4% in 2018, propelled by central bank buying, which increased again in 2018 as many countries diversified their reserve holdings, and purchases jumped by 74% over 2017 to 651.5 tonnes. Central banks have consistently been net purchasers of gold since 2010, and demand in 2018 was the highest in 50 years. Some non-traditional buyers such as India, Poland and Hungary entered the market with purchases of 45.5 tonnes, 25.7 tonnes and 28 tonnes respectively. However, Russia was again the largest buyer in 2018, with its latest reported holdings climbing by 274.3 tonnes as it continues its de-dollarization policy. Turkey added 51.5 tonnes, while Kazakhstan added 50.6 tonnes. Jewelry demand, which accounts for over 50% of overall demand, was flat compared to 2017. The price drop hampered investment demand, and gold-backed ETFs lagged by 137.5 tonnes compared to 2017.

### **Related-Party Transactions**

#### *Manager and Trustee*

BMG Management Services Inc. (the “Manager”) is the manager, trustee, registrar and transfer agent for the BMG Fund. The Manager provides, or arranges for the provision of, all management and administrative services for day-to-day operations, including providing fund and unitholder accounting, recordkeeping and other administrative services. At December 31, 2018, the Manager held 11,938 Class D units and one Class I unit of the BMG Fund.

In consideration of management and administrative services, the BMG Fund pays the Manager a monthly management fee based on the NAV of the various classes of units of the BMG Fund, calculated daily. For the year ended December 31, 2018, the BMG Fund incurred management fees of \$1,713,377.

#### *Distributor*

BMG Marketing Services Inc., an affiliate of the Manager, has been retained by the Manager to assist with the marketing and distribution of units of the BMG Fund in the exempt market pursuant to prospectus exemptions.

#### *Independent Review Committee*

The Manager has created an independent review committee (the “IRC”) to review and provide impartial judgment on conflict of interest matters. The IRC reviews potential conflicts of interest referred to it by the Manager, and makes recommendations on whether a course of action is fair and reasonable for the BMG Fund. The IRC prepares an annual report of its activities for interested parties. A copy of the IRC’s report for 2018 is available at [www.bmg-group.com](http://www.bmg-group.com).

## FINANCIAL HIGHLIGHTS (continued)

### Explanatory Notes to Financial Highlights

#### Fund's Net Assets per Unit of each Class

(1) This information is derived from the BMG Fund's financial statements. In the period a BMG Fund or class is established, the financial information is provided from the date a particular class was first offered to the end of the period. The NAV per class presented in the financial statements does not differ from the NAV per class calculated for fund pricing purposes.

(2) Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) in net assets from operations is based on the weighted average number of units outstanding over the fiscal period. This table is not intended to be a reconciliation of opening and closing net assets per unit.

(3) The BMG Fund did not make any distributions.

#### Ratios and Supplemental Data

(1) This information is provided as at the end of the period shown.

(2) The management expense ratio is based on total expenses for the stated period, and is expressed as an annualized percentage of daily average NAV during the period.

(3) The trading expense ratio represents the total commissions and other portfolio transaction costs expressed as an annualized percentage of NAV during the period.

(4) The BMG Fund's portfolio turnover rate indicates how actively the BMG Fund's gold bullion investments are traded. A portfolio turnover rate of 100% is equivalent to the BMG Fund buying and selling all its gold bullion once in the course of the relevant period. There is no trading cost payable by the BMG Fund. The higher a portfolio turnover rate in a year, the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the BMG Fund.

### Management Fees

Management fees are paid by each class of the BMG Fund to the Manager, and are calculated at the applicable annual percentage of the NAV of each class of the BMG Fund. A portion of the management fees paid by the BMG Fund is for trailer fees paid to dealers. The Manager provides, or arranges for the provision of, all management and administrative services for day-to-day operations, including providing fund and unitholder accounting, recordkeeping and other administrative services. The trailer fees are a percentage of the daily average NAV of the applicable class of units of the BMG Fund that are held by the dealers' clients. No trailer fees are paid with respect to Class C2, Class C3, Class F or Class S1 units of the BMG Fund. The table below outlines the BMG Fund's annual management fees for Class A, Class B3, Class C2, Class C3, Class D, Class F, Class S1 and Class S2 units, and how those fees are split between trailer fees and portfolio administration.

	Class A	Class B3	Class C2	Class C3	Class D	Class F	Class S1	Class S2
Management Fee	2.25%	1.25%	0.87%	0.75%	1.50%	1.25%	0.45%	0.95%
Portfolio Administration Fee	55.6%	60%	100%	100%	83.3%	100%	100%	47.4%
Trailer Fee (maximum rate as a percentage of management fees)	44.4%	40%	0%	0%	16.7%	0%	0%	52.6%

Out of the management fees that the Manager received from the BMG Fund, the Manager paid trailer fees of \$638,774 during the year ended December 31, 2018.

### Operating Expenses

For the year ended December 31, 2018, the Manager did not absorb BMG Fund operating expenses because the management expense ratios were below the expense cap. The decision to reduce operating expenses is made at the discretion of the Manager, and may be changed at any time.

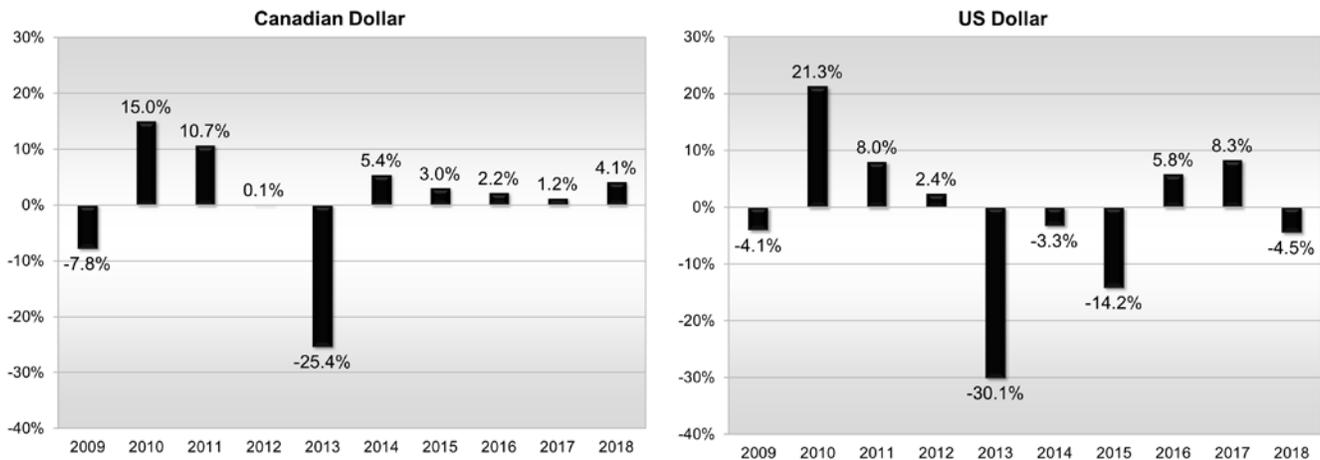

## PAST PERFORMANCE

The following information does not take into account sales or redemption charges that would have reduced returns. Past performance does not necessarily indicate how the BMG Fund will perform in the future.

### Year-by-Year Returns

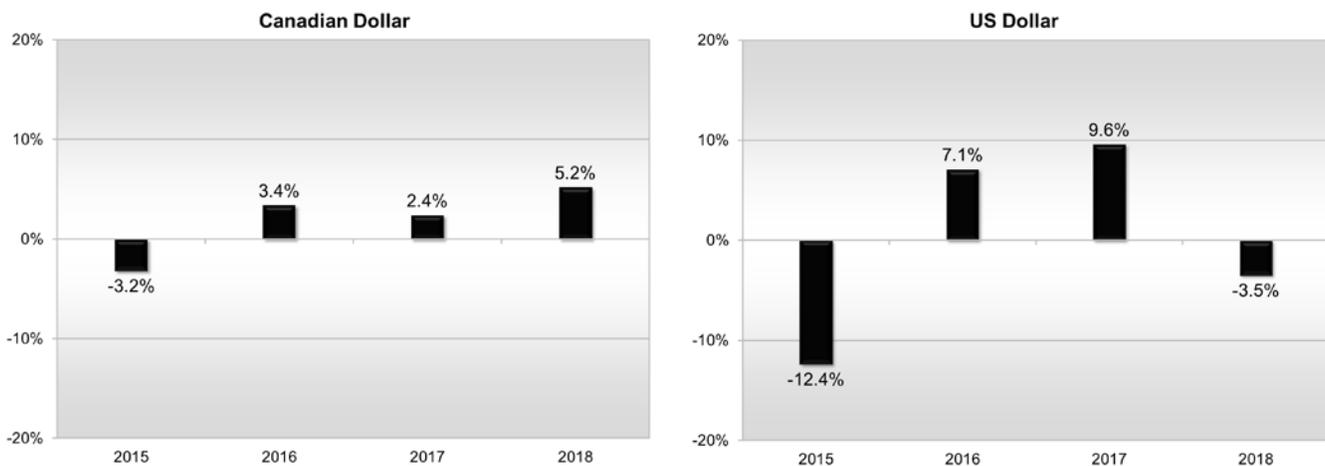

The following bar charts show the BMG Fund's performance for each class of units of the BMG Fund in Canadian and US dollars, as applicable, in each of the years shown. They illustrate how the BMG Fund's performance has changed from year to year. In percentage terms, the charts show how much an investment made on the first day of each financial year has increased or decreased by the last day of each financial year.
